Product Name :
Solar Split Air Conditioner

Product Code :
EQU-UE-SAC0003

Description :

Solar Split Air Conditioner

Technical Specification :

Dual power supply: Air Conditioner works directly with 2 powers (solar panel power + electricity power). The change between 2 powers happened automatic and seamless depend in solar strength.

Built-in software has a tracking function to make sure MAX solar DC output power can be used for the air conditioner.

Green energy products with high seer efficiency.

Convenient and quick installation, no longer require solar controller , battery and inverter;

Hybrid system uses solar panels to generate electricity during the day. When there is no sun at night, the grid power will automatically get connected as input. Even if the power is cut off or cut off during the day, it will not stop working. It is suitable for places with high electricity costs. Customers have already experienced this system. Will save them 40-100% of their electricity bills. Off-grid is to use solar panels to generate electricity during the day and store the excess electricity in the battery. When there is no electricity at night, it continues to run with the electricity in the battery. It is suitable for places where there is no electricity.
