Product Name :
Power Saving Efficient Central Air Conditioner

Product Code :
EQUP-UE-SAC0005

Description :

Power Saving Efficient Central Air Conditioner

Technical Specification :

In central solar air conditioner system, the air conditioner is powered by energy and the grid power is used as the backup power. In the daytime, the system draws the power from solar panel as preference input; when the sun is not strong enough to satisfy the needs of the AC, the grid power will automatically get connected as input. It's mainly used at places with high electricity rates in order to cut electricity bills. It's the 4th generation models, designed for low cost, easy installation and a fast payback, requiring no batteries, no controller—just plug in solar panels to save 40-100% power in daytime compared with an electric AC.

Capacity (btu): 24000btu

COP: 3.47

EER: 5.11

Power?W?: 5800W

Cooling/Heating: Cooling and heating

Customized size and specification as per your drawing or sample. We Power Saving Efficient Central Air Conditioner suppliers UAE Dubai, can make the Power Saving Efficient Central Air Conditioner as per your request, specification, size and bulk quality Dubai.
