Product Name :
Solar Hot Water Panels

Product Code :
EQUP-UE-SWH0006

Description :

Solar Hot Water Panels

Technical Specification :

Flat panel solar collectors working principle is different from evacuated tubes collector. A glazed flat-plate solar collector consists of a shallow rectangular box with a flat black plate behind a tempered glass cover. The plate is attached to a series of parallel tubes or one serpentine tube through which water or another liquid (such as an antifreeze solution) passes. Sunlight passes through the glazing and strikes the absorber plate, which heats up, changing sunshine into heat energy. The heat is transferred to liquid passing through pipes attached to the absorber plate. Bontel can supply you different kinds of high quality absorber plate with selective film.

Most popular for solar water heating applications;

Works without over-heating problem to injure system;

Super anti-freezing performance to work below -40°C;

High pressure working with safe and stable performance;

Wide applications for solar water, room and floor heating;

Strong adaptability to various roof structure installations;

Customized size and specification as per your drawing or sample. We Solar Hot Water Panels suppliers UAE Dubai, can make the Solar Hot Water Panels as per your request, specification, size and bulk quality Dubai.
