EQUP-UE-FLM0002

Description :

Cloth Feeding Machine

Technical Specification :

Cloth feeding machine is a kind of vacuum feeding equipment which is efficient and small footprint. It can improve cloth ironing effect and save labor. It can improve cloth feeding effect and quality whether it is small piece or large piece. Usually it is installed in front of a fast speed ironing machine, operator need to only put the cloth on the feeding machine. The machine can transfer the cloth into the vacuum room in order to flat the cloth, then transfer to the ironing machine. After put one piece of cloth, operator can put next one quickly because the feeding machine running fast with high speed rotating roller. The vacuum room can make sure the cloth flat and smooth. Two plates are installed on the edge of outlet to prevent cloth from winding. Feeding machine can make cloth much smooth and flat before transfer into the ironing machine, and it can improve cloth feeding efficiency. Customized size and specification as per your drawing or sample. We Cloth Feeding Machine suppliers UAE Dubai, can make the Cloth Feeding Machine as per your request, specification, size and bulk quality Dubai. Cloth Feeding Machine Suppliers UAE, Exporters Dubai
