Product Name :
Detectable Buried Underground Warning Nets

Product Code :
UAETRIC150002

Description :

Detectable Buried Underground Warning Nets

Technical Specification :

The warning net is a bright, coloured polypropylene mesh which incorporates a stainless steel tracer wire which runs the entire length of the marker and to which is laminated a coloured polyethylene tape printed with a suitable warning message. Different colours of warning mesh are available to warn of the presence of buried service lines e.g. water pipelines, sewers, gas pipes, telecommunications and fibre optic cables or electricity cables

Plastic underground warning mesh is normally installed a specified distance directly above the utility to be marked so that future excavators will be aware of the cable or pipeline further below.

Locata warning meshes offer a visual warning to excavators and have the added advantage that they detectable on the surface by, eg CAT & Genny. They are not intended to offer any protection or resistance to further excavation. Warning meshes may also be used in combination with cable protection tiles or cable protection tape or, other underground warning tapes

Product Feature:

Available in detectable and non-detectable versions

Manufactured from high-strength coloured rot-resistant homopolymer polypropylene plastic mesh.

Warning message printed in black

Custom orders manufactured in any colour text or logo

Widths: 100mm, 200mm & 300mm

6.Lengths: 50m to 600m

Material: PE
Roll Size: 100m x 200mm/roll
Mesh Weight: 60 - 200gsm
Features: Non-adhesive Polyethylene Construction
Thickness: Can be customized
Length: Can be customized
